

## Commercial Usage Guide

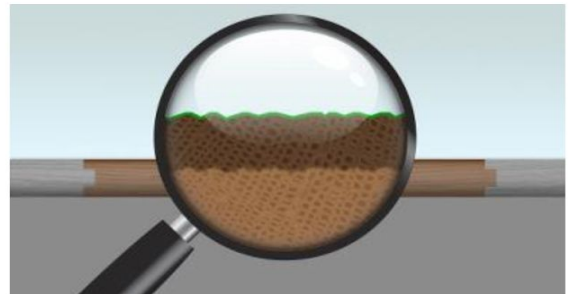

Required	UV Oil	Lacquered Finish
Master Soap	Weekly	
Oil Refresher	Every 3 months	
Maintenance Oil		
Maintenance Paste	Every 12 months	
Lacquer Soap		Weekly
Lacquer Care		Every 6 months

### Regular cleaning of oiled wood floors

What characterizes an oil finish is that the oil penetrates and saturates the wood, creating a very strong finish that protects the wood from within. However, oiled floors can suffer from high wear, which makes them more disposed to moisture and damage. Therefore, it is very important to clean oiled wood floors with a quality wood soap specially formulated to add nourishment to the floor in order to extend its life.

We recommend [WOCA Natural Soap](#), a soap ideal for wood floor cleaning and maintenance of all known oil systems. It is a quality wood soap containing soy and coconut fats, which due to its nourishing properties quickly closes the pores of the wood and protects against dirt and penetration of liquids.

In order to maintain the strongest oil finish as possible, we recommend cleaning the oiled wood floor with Natural Soap regularly and mopping with [WOCA Oil Refresher](#) approx. every fourth time or as needed. Oil Refresher cleans the surface and contains a bit of oil, which penetrates into the wood and adds additional strength to the existing oil finish.

### Regular cleaning of lacquered wood floors

Lacquered wood floors are extremely popular as they are very easy to clean and maintain. The reason is that the lacquer sits on top of the wood, which creates a very hardwearing surface as well as smooth look and feel. Regular and proper cleaning of lacquered wood floors is essential, if you want the lacquer finish to look good and last as long as possible.

[WOCA Vinyl- and Lacquer Soap](#) is ideal for the regular cleaning of all lacquered wood floors. The soap is a pH-neutral soap, which efficiently removes abrasive dirt and dust from the floor without affecting the actual lacquer finish. As Vinyl- and Lacquer Soap leaves no buildup of soap, it is ideal for surfaces requiring frequent cleaning, for instance kitchen floors.

Vinyl- and Lacquer Soap can also be used for cleaning of lacquered cork floors.
