Exceptional
interiors begin with
strong foundations

Laying the groundwork for great design

At Plank, we believe timber flooring should balance architectural intent with on-site practicality — delivering exceptional performance without compromise. Our focus on making ambitious design attainable has earned the trust of Australia’s leading architects, designers, builders and developers.

Founded in 2015 by carpenter Richard Karsay, Plank has grown into a team with more than 50 years of combined expertise. Drawing on this industry knowledge, we combine premium natural materials with technical precision to create solutions that perform across a wide range of applications.

With a focus on innovation, sustainability and practical design outcomes, we collaborate on landmark multi-residential, commercial and hospitality developments and are known for our ability to deliver on complex briefs with clarity.

Strategically located in Sydney, Melbourne, Brisbane and South Australia and supported by a national network of experienced installers, we offer end-to-end project support and consistent service at every stage.

More than a flooring supplier, Plank is a sector specialist. We understand the pressures of construction and design and we’ve shaped our collections, lead times and pricing to meet the realities of delivering ambitious projects.

At Plank, every decision, from sourcing to delivery, is driven by performance, precision and a commitment to better outcomes on site.

Our difference

Built for design,
backed by
performance

Rawma flooring at The Sebel Noosa by Bond Theory
and Silverfox Construction

Exceptional timber flooring begins
with solid foundations. At Plank, every
board is designed and engineered for
performance to meet the demands of
modern construction.

We not only make premium-quality
products accessible but also offer
the guidance and technical support
our clients need to deliver confident
outcomes across every surface.
It's these details that define our
difference.

Engineered for excellence

Engineered for excellence

Our boards are designed to balance architectural intent with on-site practicality, making premium-quality flooring more accessible across sectors.

Cross-laminated core

Our signature boards feature a premium European oak or Australian hardwood top lamella bonded to a high-performance cross-laminated plywood core. This high-performance core structure improves dimensional stability, supports multiple installation methods and minimises movement in wider and longer boards.

Comprehensive solutions

We offer one of the most extensive flooring collections in the industry, with a curated palette of colourways, profiles and thicknesses — including herringbone, chevron and matching stair nosing. For multi-residential builds, our Acoustico collection offers a ready-to-install acoustic flooring solution.

Green by design

Sustainability is integral to our ethos. We use FSC-certified timber, low-VOC finishes and partner exclusively with manufacturers who share our environmental values.

An enduring finish

All boards are prefinished with WOCA UV Oil — a durable, low-VOC treatment developed in Denmark to enhance the timber’s grain, tone and longevity. Our floors are also supported by WOCA-compatible maintenance programs that help extend their lifespan.

Quality within reach

We offer premium-quality timber flooring at an accessible price point, supporting ambitious design outcomes without the usual cost or complexity.

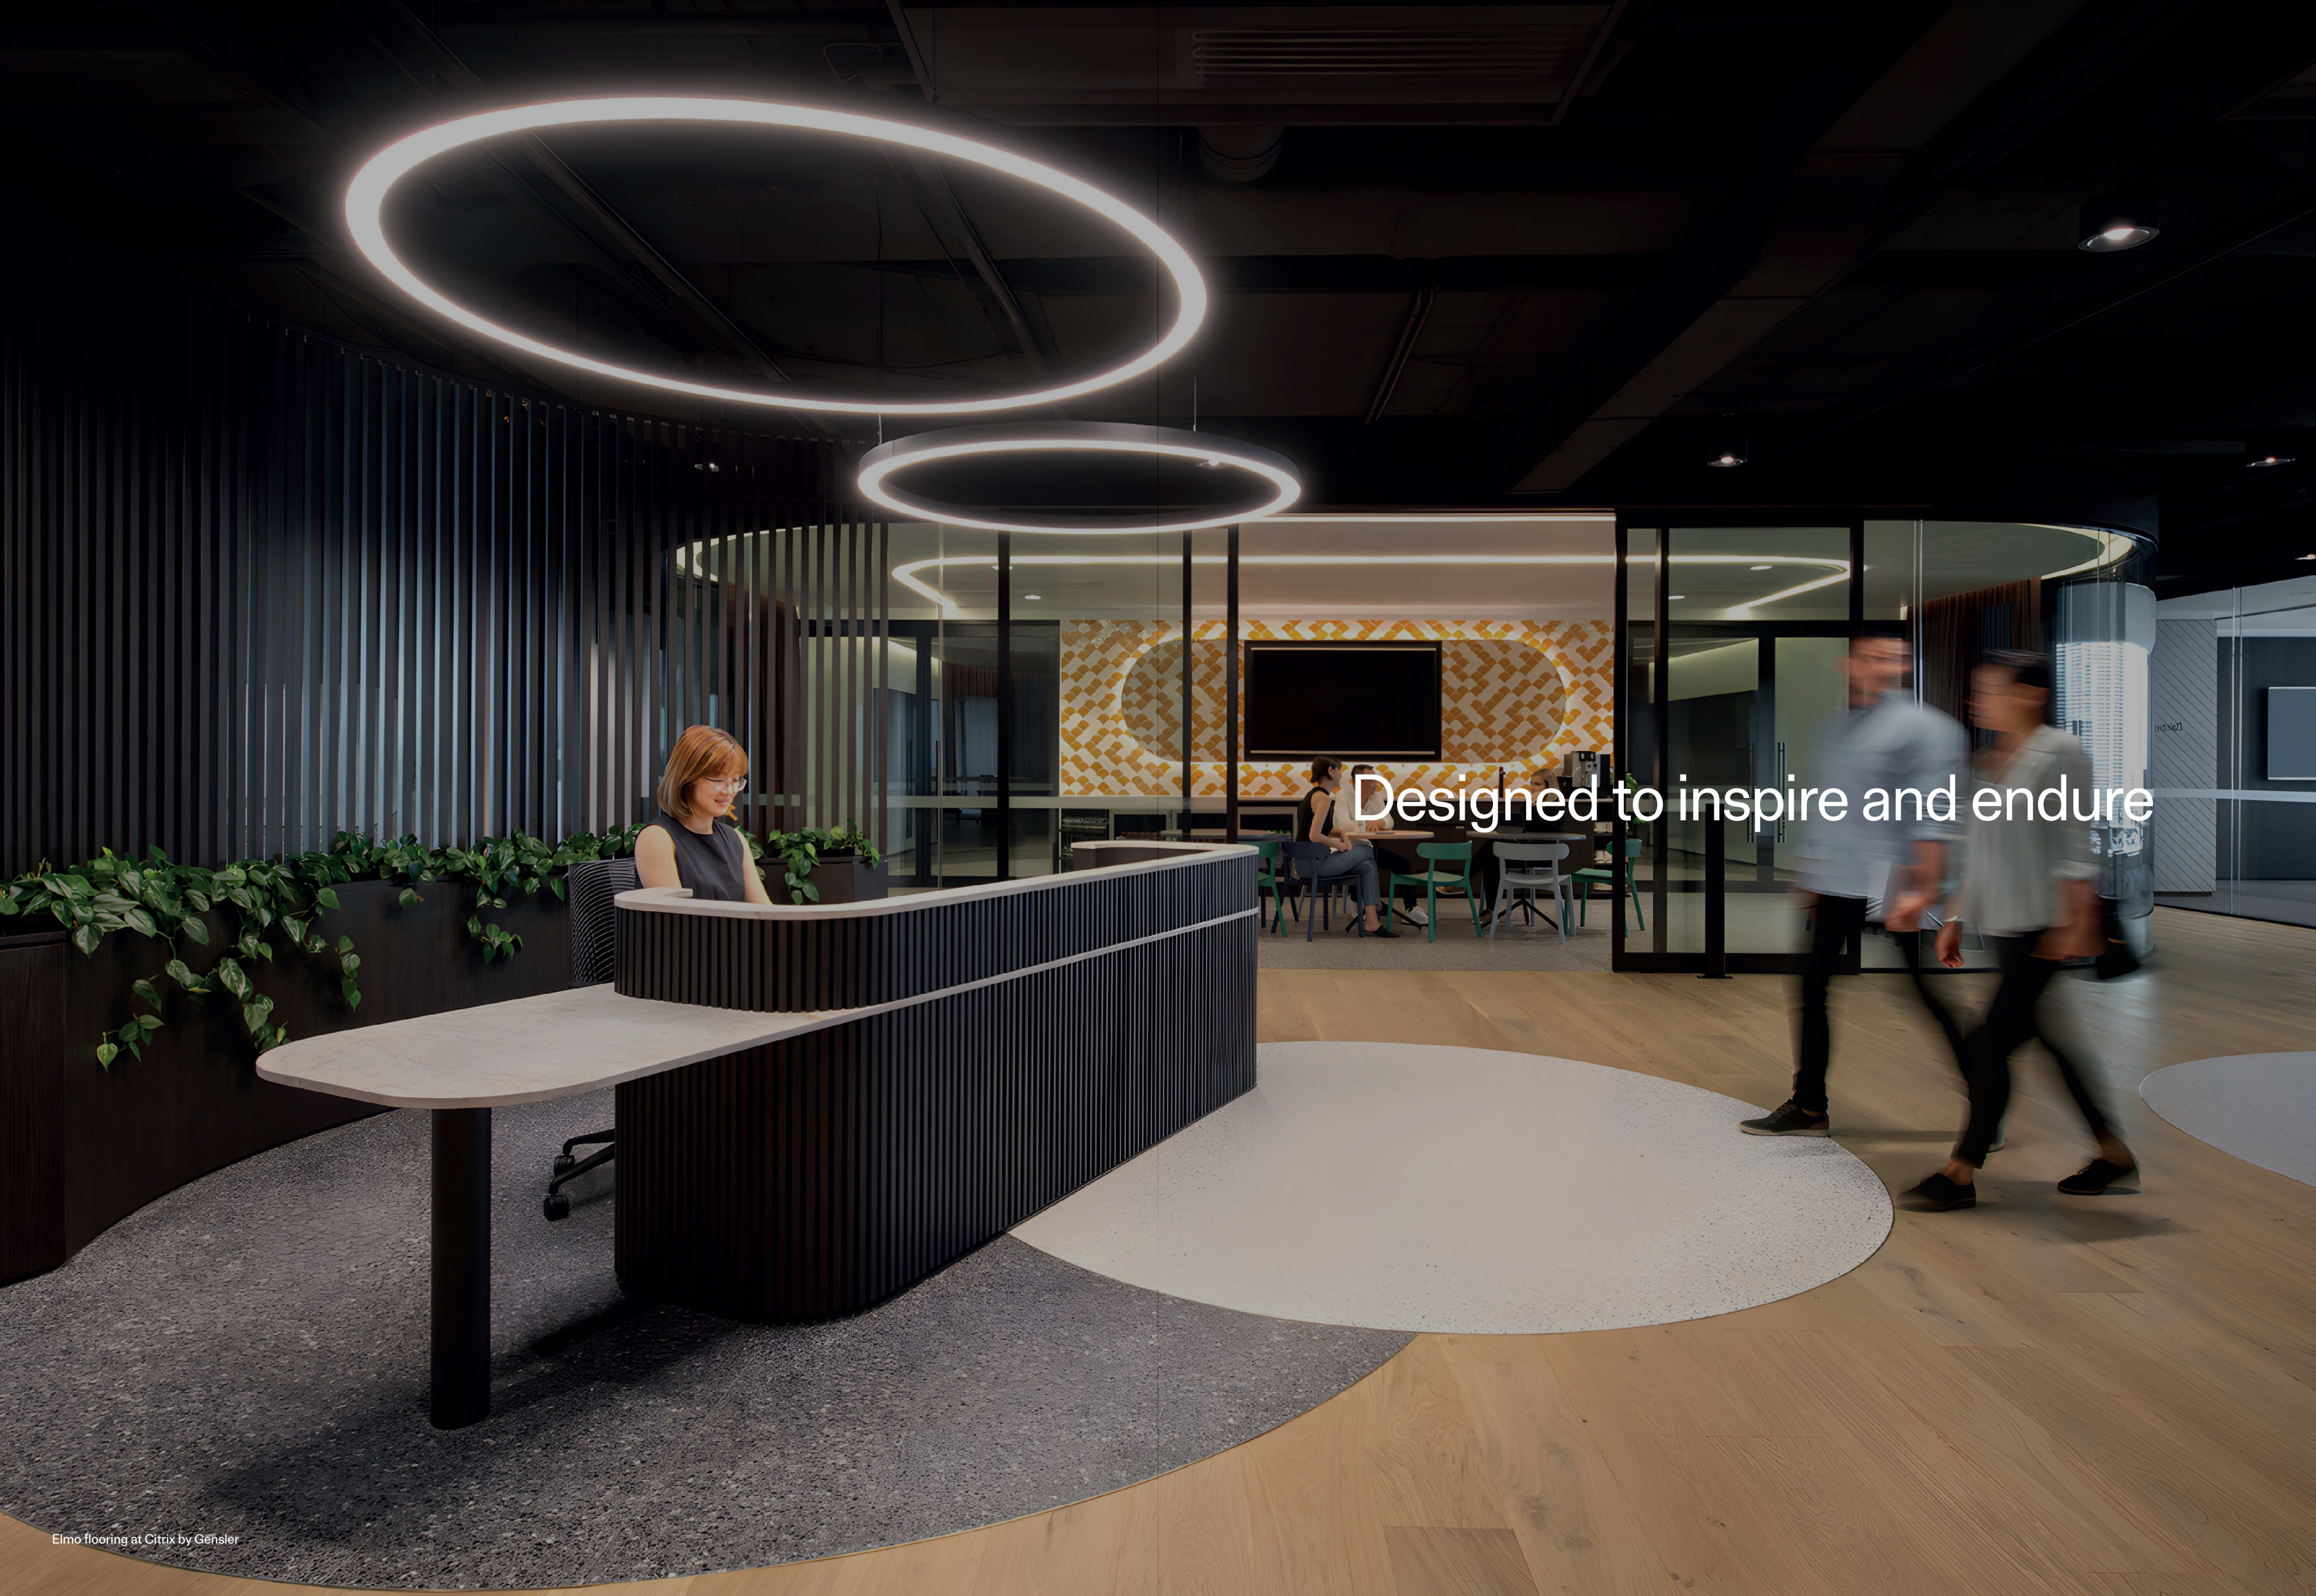

Support at every stage

With over 50 years of combined expertise and a national network of experienced installers, we offer trusted technical guidance from specification to installation. All Plank products are backed by a 25-year structural warranty.

4 mm solid oak wear layer

15 mm plywood core

A modern office interior featuring a curved desk with a woman working, circular light fixtures on the ceiling, and people walking in the background. The space is designed with a mix of materials, including wood, metal, and concrete, and is illuminated by warm, ambient lighting.

Designed to inspire and endure

Our collections

A range for every interior

Dozie Chevron flooring at Boston Bridgeman Downs
Display Home by Clarendon Homes

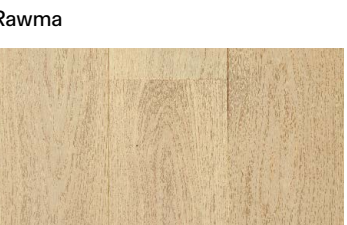

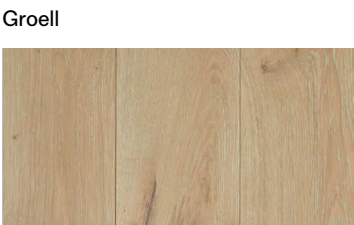

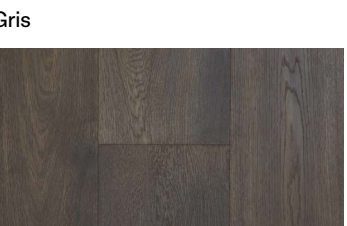

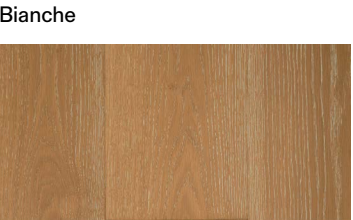

Plank offers one of the most comprehensive ranges of engineered timber flooring in Australia, with a curated selection of colours, formats and finishes designed to meet the demands of large-scale projects, from multi-residential to commercial and hospitality spaces, without compromising on quality or performance.

This extensive collection enables consistent, high-quality outcomes across a wide variety of applications, architectural styles and budgets.

European oak

Crafted from responsibly sourced European oak, this collection offers a wide selection of colourways, finishes and formats — including herringbone, chevron, extra-long and extra-wide boards.

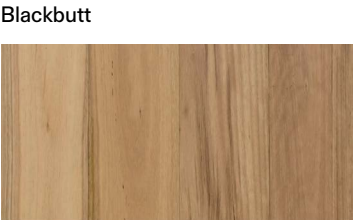

Durable, versatile and contemporary, it's a proven choice for interiors that demand refinement, reliability and longevity.

Australian hardwood

Showcasing the raw beauty of native timber, our Australian Hardwood range includes Spotted Gum and Blackbutt — two species known for their strength, grain variation and warm, natural tones.

A natural choice for projects seeking a strong local connection and proven durability.

European oak

A refined collection that combines timeless appeal with engineered performance, making it a versatile choice for residential, commercial and hospitality interiors.

Available in four size options across all colourways. With matching stair nosings, it ensures cohesive, designed results across floors, walls and stairs.

Design begins beneath your feet

Bespoke

The freedom
to specify
without limits

Bespoke flooring at One Barangaroo, Crown Sydney
by Wilkinson Eyre Architects

Our bespoke offering gives developers, builders, architects and designers the freedom to specify timber flooring to exact project requirements. By prioritising flexibility and innovation, we help reshape how timber flooring is specified.

From custom colours to unique board dimensions, patterns and finishes, we collaborate closely to realise complex design visions across multi-residential, commercial and high-end interiors.

Every project has its own vision. Our bespoke offering gives architects, designers and builders the freedom to specify beyond the standard, without compromising on performance.

Bespoke flooring at One Barangaroo, Crown Sydney by Wilkinson Eyre Architects

Custom colours

Create a tone unique to your project, or colour-match an existing finish. Our team works closely with architects, builders and developers to create bespoke stains and treatments that align with each project's palette and intent. From subtle tonal variations to bold, expressive hues, every finish is tested for quality, durability and consistency, giving you the freedom to realise your vision with confidence.

Board dimensions

Tailor widths, lengths and thicknesses to meet performance or budget targets while keeping the design intent.

Patterns

Specify distinctive formats, including herringbone, chevron or scatter parquetry. Scatter parquetry offers endless design potential, allowing planks to be arranged in irregular or custom compositions that bring individuality and a handcrafted quality to large-scale spaces.

Surface texture

Choose from refined finishes or the bandsawn texture of our Artisan collection for added character and depth.

Acoustico integration

Enhance acoustic performance in high-density and multi-residential projects by incorporating our ready-to-install system, available with a 3 mm or 5 mm cork underlay.

These bespoke and high-volume solutions enable creative freedom without compromise. To ensure feasibility and appropriate lead times, we recommend involving our team early in the design process, allowing us to develop, test and deliver the right solution for your project, on time and ready to perform.

Applications

Versatile solutions for every surface

Merlot flooring at Inspire Pilates by Bergman & Co.

Plank boards are designed for use across a wide range of interior surfaces — not only floors. From walls and ceilings to stairs and joinery, our collections provide a consistent material language that brings warmth, texture and cohesion to residential, commercial and hospitality spaces.

Manufactured to exacting standards, Plank products deliver performance and design continuity across every surface.

Solutions for every surface

Floors

Flooring offers durability and comfort underfoot.

Walls

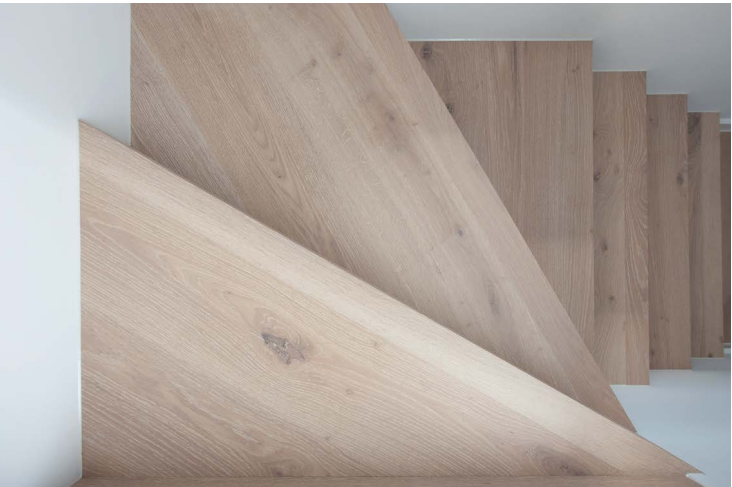

Wall and ceiling applications add visual depth and improved acoustic performance.

Stairs

Matching stair nosings are available across the core range.

Flush

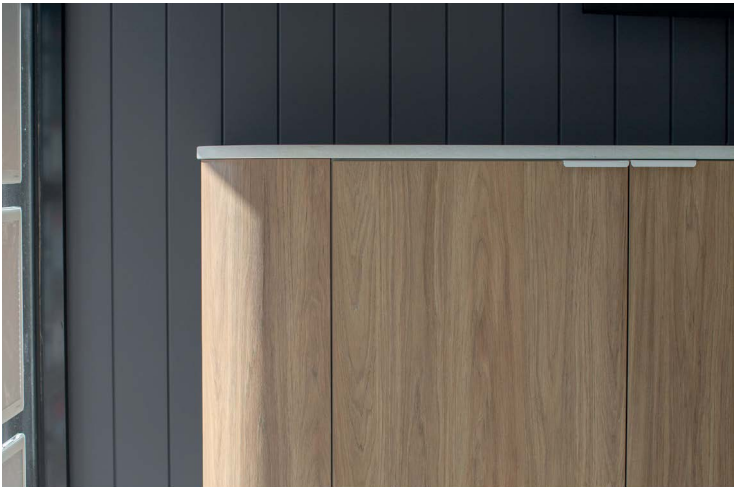

Flush nosings create a seamless junction between tread and flooring, delivering a clean, contemporary finish.

Ceilings

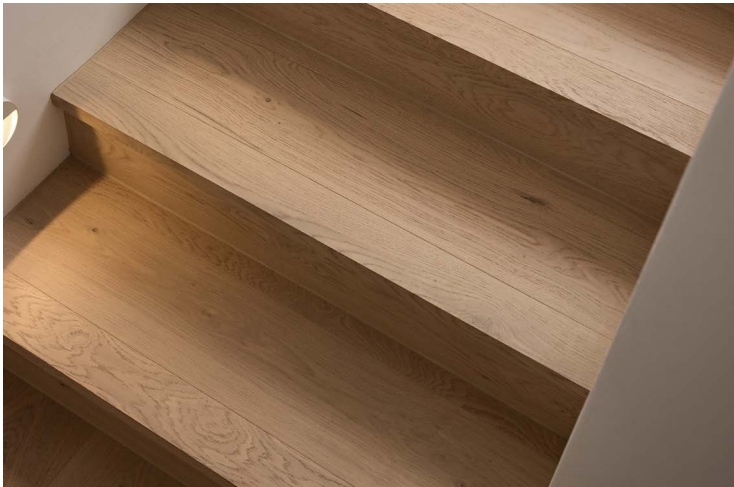

Timber ceilings introduce texture, enhance acoustic comfort and seamlessly extend the material palette beyond the floor.

Joinery

Plank boards can also be used for integrated joinery such as bar fronts, built-in seating and cabinetry.

Overhang

Overhang nosings introduce a defined edge detail, creating subtle shadow lines and a more traditional stair profile.

Brass inlays

Nosings with brass inlays offer a durable, high-contrast edge detail and are often used in commercial fit-outs where visibility and compliance are key.

Caring for your engineered flooring

Plank flooring is designed to endure. With proper maintenance, it will retain its beauty and performance for decades. All Plank floors are finished with WOCA coatings and should be maintained using the WOCA system to preserve their appearance and performance.

WOCA products are specifically formulated for oil-finished timber and are backed by over 40 years of wood care expertise.
